AUB'S LARRY BURGER GAINS CERTIFICATION

ATHENS, Tenn. – Larry Burger, an operator at AUB's Vernon S. Wade Water Filter Plant, recently received his Grade III Operator Certification.

Public water systems are required to have certified operators to make decisions that impact water quality at the treatment plant. Those decisions include determining chemical feed rates, laboratory testing, and other functions critical to ensure top-quality drinking water for the community.

Burger has been with AUB since June 2005. An Athens native, he lives in Athens with his wife, Leslie, and daughter Trista.
